Rusto

Mxalt Rust O is a premium penetrant, with high capillary action, has excellent creeping properties ensures good penetration even to the stubborn rusted screws and bolts. Can be applied on all types of rusted joints and fasteners on passenger cars, trucks, buses, agriculture machineries ,construction ,equipments, generators ,general purpose mechanical equipment for maintenance and repair. Mxalt rusto allows free movement of mechanical joints. Repels moisture from joints ,spark plugs and electrical parts. Comes with an extended nozzle for easy access to unreachable areas.

Directions for use :

- Apply Mxalt Rust O on the rusted joint on close proximity, allow for 1- 2 mins for greater penetration later apply adequate force with spanner to loosen the fastener.
- For stubborn corrosion, repeat the application and allow rusto to work for a longer time.
- Do not wipe off the remaining Rusto , it gives better corrosion protection.
