

## Axle Stands

**Art No : AX 3101090**

A pair of broad base professional duty Axle stands with positive ratchet action for quick height adjustment and secure locking under downforce load.

Available in 3 T, 5 T & 6 T

Ratchet type Axle stand with cast iron support post and tough steel plate welded base.

Angled teeth in post prevent accidental release of load – the more weight applied, the tighter the post is locked.

## Trolley Jacks

**Art No : AX 3101093****Art No : AX 3101094****3 ton****3.5 ton**

This model has a single hydraulic unit and exclusive dual pump system for speedy lifting with far fewer pumps saving time and energy. Heavy duty large swivel castors and large saddle ensures ease of use under the vehicle. High on quality and designed to give you years of service.

3 Ton Quick Lift and Low Profile Professional Trolley Jack

Best of both worlds with this rapid lift 3 ton trolley jack which also has a low 95mm minimum saddle height.

This trolley jack also boasts an extra heavy duty chassis with large robust wheels and saddle and long jacking handle. Our quick lift trolley jacks have a single piece hydraulic system with dual pump which allows the trolley jack to be pumped 1 or 2 times before the saddle reaches the vehicles jacking points. Both CE and TUV Approved showing it is both a Quality and Robust Unit.

## Battery Hydrometer

**Art No : AX 3101095**

A car battery hydrometer comes in handy when facing charging or power issues. If your battery discharges from time to time, suddenly dies or makes it hard to start your vehicle, a hydrometer will tell you if your battery is actually charged, needs a charge, or it's time for a replacement.

On a free-maintenance type battery you know its condition by the color of its eye indicator. But a maintenance-type battery will leave you puzzled when you find no physical signs of problems like damage or corrosion.
