

# AC Leak Detector

Art No : AX 3101118

- Checks for leaks in AC system almost immediately Bright Fluorescent dye compatible with R134a and R12 refrigerant system.
- Environment friendly, solvent free dye. No harm to the AC System.
- Easily inject dye with System Pressure up to 300psi (20kg/sq.cm).
- Approved by several OEMs in USA. Test report can be provided.
- The dye detects the actual position of the leak because it leaves a “fluorescent stain” .
- The “fluorescent stain” helps detect multiple leaks.
- Dye remains in AC system for month and years without damage the system.
- It can detect very minute leaks – even as low as 15ml/year.
- No need to remove condenser to check for leaks. Since the light through the grill and looks for any “fluorescent stain” .
- Can detect leaks in the evaporator – shine the light on the condensate water that drips thought the drain tube and looks for “fluorescent stain” .
- One bottle of dye can be used over 60 vehicles cost effective.
- Dye can be purchased through Authorized Distributors / Dealers.
- To have better result inject the dye when the AC System does not have Leaks therefore you can find the leak instantly when it occur.
- Quickly find the exact source of each and every leak.
- Leaks are detectable at a distance.
- Very small, multiple and intermittent leaks are easily.
