## Digital Wall Mounted

The all new Axalt Nitrogen Tyre Inflator for cars, Trucks and Heavy duty vehicles features innovative technology. It is a highly accurate and reliable product that employs standard compressed air supply to produce a Nitrogen enriched mixture of purity greater than 96%, ensuring a longer life for the car's, Trucks and Heavy duty tyres and enhanced driver safety

### Features:

Inbuilt Nitrogen storage tank

- Nitrogen purity: 96-99%
- Pump the air from the tyre by the internal vacuum generator
- Auto Start Inflation
- Single Tyre Application
- 72PSI/5bar/500kPa
- Generates nitrogen from your compressed air
- Automatic zero-drift adjustment at the touch of a button; calibrates instantly to the local atmospheric pressure
- Low warm-up time
- Records the last successful filled set pressure
- Comprehensive diagnostics and error reporting
- Audio and visual indication at the end of inflation/deflation cycle: audible buzzer and red LED indicator, visible from 10 m to signal end of cycle
- Multiple safety control circuits embedded in the system for high level of customer safety
- Availability of both direct and digital ports for filling of tyres
- Auto/manual shut-off to save energy after nitrogen generation
