Torque Multiplier

A torque multiplier uses a planetary gear system, or epicyclic gear train. As you turn the input shaft, the output shaft slightly rotates. It takes 65 turns of the input shaft to turn the output shaft just once! With a 1:65 output ratio. This small, light tool is an ideal addition to the basic tools provided for every industrial vehicle, agricultural vehicle, bus, etc.

Easily loosens heavy duty wheel nuts in Trucks, dumpers etc.,

No need of using heavy levers or nut spanners

Supplied with Torque Multiplier, Lever handle, 4 Sockets and with a Extension Rod
